Education

BSc Information Technology
3rd year
North West University

Key Skills

Java
C#
C++
Python
SQL
MS Office
Cisco Packet Tracer
Git Hub

Languages

Afrikaans
English

Objective

I am a driven and enthusiastic IT student with a passion for technology, solving problems and enhancing my technical skills. As part of my undergraduate degree, I have gained experience over multiple projects working independently, as well as in a group. I enjoy learning from others and seek hands-on experience on the IT industry.

Undergraduate project experience

Encryption System Development

- Implemented a secure encryption system using Java, applying advanced cryptographic techniques to ensure data protection.

Encryption System Development

- Planning and design of a computerized system utilizing C# and Microsoft SQL Server, improving data management and operational workflows.

Network Infrastructure Planning

- Designed a comprehensive network infrastructure for a new office environment, optimizing connectivity and scalability.

Text Messaging Application

- Developed a Windows-based text messaging application, focusing on user experience and efficient communication protocols.

Vacation work experience

Abacus Financial Crime Advisory (Pty) Ltd (2024)

- Total of five weeks experience gained in data capturing, analytics, forensic accounting, and IT tool implementation.
